

CREATING LEADERS FOR THE FUTURE

Working on final details!

Once the Guides for Entrepreneurship Training for Disabled People have practically been completed, we are now working on small and final details for their next public presentation!

What we have lately been doing?

The last months have been dedicated to an arduous task: the putting in writing the training program that we have been designing so far: we have completed them with the expertise of the consortium entities; we have carried out qualitative and quantitative research on the preferences and experiences of entrepreneurs with and without disabilities in partner countries; we have reviewed grey literature; we have compiled expert contributions, etc.

After a systematic review, all of this information allowed us to design a training and accompanying services program specifically designed for the full inclusion of entrepreneurs with disabilities.

Afterwards, and as a validation of the obtained results, each partner organized a workshop with different stakeholders related to entrepre

neurship and disability, which were asked about some key issues and core aspects of the project for discussion. The obtained results have allowed to enrich the contents of the Guides to be generated in the framework of the Project.

Some images and comments gathered during the development of the workshops:

Fundación Prevent: Spain

“we still have to keep in mind that the training is important, but the intensity and length of it should be totally customized”

Fundacja Aktywizacja: Poland

“training methodology should take into account how to build future entrepreneur awareness in the field of very important things, for example: how to deal with the economic risk, how to deal with tax issues and possible fail”.

Mine de Talent: France

The workshops full results can be seen at the project webpage: www.leadersforthefuture.eu

What are we going to do now?

Celebration of our last transnational meeting

On the 4th and 5th of July we will be holding the last transnational meeting between the members of the Creating Leaders Project in Barcelona, at the Prevent Foundation headquarters.

These two working days will allow us to define and agree on those last details that will ensure that the results obtained after two years of work have internal consistency and guarantee quality products.

Furthermore, in order for partners to be able to see first-hand a part of the entrepreneurial ecosystem in Spain, an informed visit will be made to the facilities of the Research Center of the Autonomous University of Barcelona, which has an Entrepreneurship Support Service from which, among other activities, they are developing several training programs for entrepreneurs.

Next publication of the Guides

During the next 2 months, the two Methodological Guides for developing inclusive entrepreneurship training will be published on the Project website (www.leadersforthefuture.eu):

- **Training methodology and contents for an inclusive entrepreneurship**
- **Supplementary activities for inclusive training in entrepreneurship**

They will also be sent to all the partners' databases, which include the contact details of the main stakeholders in the field of entrepreneurship and / or disability: public entities (related to the social, labor, Innovation fields), public and private universities, social sector entities that develop entrepreneurship and / or disability programs, entrepreneurs with or without disabilities, training centers, etc. We aim at achieving maximum replicability at European level of the created methodology.

Event for the guides' presentation

The partners of the Creating Leaders Project (France, Italy, Poland and Spain) will make a public presentation of the 2 Guides, always aiming at finding synergies and reaching those target stakeholders, for whom the Guides represent added value and are usable to promote a common European culture of Equal Opportunities and inclusion, in this case, in entrepreneurship.

While France, Poland and Italy are finalizing details, in Spain, the event has been scheduled in Barcelona, on Friday, July 7 at Barcelona Activa headquarters (a public municipal entity in the field of entrepreneurship promotion and with a strong commitment to Equal Opportunities in the provision of its services to the community).

We take the opportunity to invite you all to this event! You will find more information at: <https://goo.gl/FVQGVk>
